

Montana State University Department of Ag. Economics and Economics	
Course:	Professor:
ECNS 251 – Honors Economics Spring 2026	Dr. Wendy Stock 110 Linfield Hall 406-994-7984 wstock@montana.edu montana.edu/stock
Hours & Location:	Office Hours:
Section 2: T & TH 8:50-10:40 LINH 113	Dr. Stock: T & TH 11:00-12:00, and by appointment, LINH 110 TA: Simon Boasiako, W&F 9:00-11:00 and 3:00-4:00, LINH 206

READ THIS SYLLABUS. IT REPRESENTS A CONTRACT BETWEEN US.

The amount of learning you gain from class is directly related to the amount of effort you put into it.

Course Description & Course Objective: Some of the most important skills you can learn include the ability to think critically, carefully and from multiple viewpoints, the ability to learn new things regardless of your current knowledge, and the ability to anticipate and solve problems. The objectives of this course are (1) to develop a foundational understanding of the ways of thinking commonly used in economics, (2) to understand the power and limits of economic models and tools, and (3) to apply economic reasoning to a variety of social and personal situations. The course fulfills the university IS core requirement and the ECNS 101, ECNS 202, and ECNS 204 requirements in the ECNS, AGBE, EFIN majors and minors.

Course Learning Outcomes: After completing this course, students should be able to:

- Apply the scientific method to economic phenomena
- Analyze, evaluate, and predict behavior and outcomes using economics concepts and models
- Apply quantitative and qualitative economic concepts to social and personal situations
- Think critically about economics methods, applications, and assumptions
- Obtain, describe, and defend an economics research question
- Effectively communicate economics concepts and conclusions to peers

Texts: Olney, Microeconomics as a Second Language, (recommended, denoted as “O” in the schedule below); Stock, Social Issues and Economic Thinking (recommended, denoted as “S” below). These texts are available on our class D2L page or from Amazon, etc.

Class Participation: Please ask questions and make constructive contributions during class. My teaching style relies heavily on class participation, and it will count as part of your grade in the class. Of course, you will not be able to participate if you don’t attend class, so you need to attend class regularly. If you have an issue that impacts your ability to participate in class, please let me know ASAP so we can make reasonable accommodation.

Class Preparation: You should read the assigned readings for each week **before** we cover them in class because we’ll cover challenging material and move fast. You will need to pass a quiz (80% or better) on the prior week’s material before class each Tuesday. **I expect the average student will need to devote at least 8 hours outside of class each week to ECNS 251.**

Teaching Assistant: In addition to my office hours, a teaching assistant is available to help you with the material. Their office hours and office location are above.

Learning Activities: Economics is best learned through practice and reflection, NOT rote memorization, so we'll do several learning activities this semester:

1. Problem Sets (P): Practice problem sets are due **by midnight each Thursday** in Canvas/Gradescope. If you have questions, I can go over a few on the day problem sets are due. I do not plan to spend a lot of class time going over questions on the problem sets, so use the teaching assistant, study groups, or my office hours for help. Work on the problem sets early and consistently and be prepared to with any remaining questions on the day problem sets are due.

2. Quizzes (Q): You must pass ($\geq 80\%$) a short D2L quiz covering the prior week's material **before class (by 8:50am) each Tuesday**. You can take the quiz as many times as necessary, and you'll be assigned the average grade of all your attempts. **If you do not pass the quiz by the due date, you will receive a "0" for the quiz.**

3. Discussions (D): We'll discuss an outside reading, podcast, or video during our Thursday class each week. **By midnight on Wednesdays**, you should: (1) write a short summary of the video/podcast, (2) write and answer your own discussion question about the material, and (3) briefly describe your "muddiest point" in terms of the week's course material.

4. Participation: Our class should function more as a discussion/seminar than as a lecture, so participation is critical. Participation will be based on a letter grade curved relative to the class (A=excellent; B=above average; C=average; D=below average). Obviously, you cannot participate if you do not attend class regularly.

5. Economic Naturalist (EN): This assignment consists of a short (~500-word) essay and ~5-minute presentation in which you use an economic principle to explain a pattern of events or behavior that you have personally observed or are interested in. You will be randomly assigned dates for your presentation and essay to be due. **No matter how well you think you write**, I encourage you to use the MSU writing center, the TA, or AI (at a minimum) to help you. The structure and flow of the paper and presentation will matter as much as the grammar. Because of structure and grammar issues, most students must revise and resubmit their EN essays before I will grade them.

Late & Missed Assignments Policy: Late assignments will be penalized 25% per day. To account for unanticipated absences, your lowest problem set (20 points), discussion assignment (10 points), and quiz score (10 points) will be automatically dropped when final grades are computed.

Exams: There will be one midterm and one comprehensive final exam. Both are face-to-face.

Challenges: If you feel that an assignment or exam question has been mistakenly or unfairly graded, you may request re-grading. Except for simple mistakes in adding up points, any request for re-grading must be submitted in writing within one-week after the assignment grades are posted and must include an explanation that correctly applies the economics concepts we learn in class to explain why your answer is correct. "Challenging" the grading of a question does not guarantee that you will receive credit for the question, only that the question will be re-graded considering the quality and content of your challenge.

Grading Policy: Grades will be assigned as follows:

Assignment	Points Possible
Quizzes: 14 @ 10 points each = 140 points	
Drop lowest quiz score = -10 points	130
Practice Problems: 12 @ 20 points each = 240 points	
Drop lowest 1 homework score = -20 points	220
Discussions: 12 @ 10 points each = 120 points	
Drop lowest discussion score = -10 points	110
Participation: A=50, B=41, C=36, D=31, F=26	50
Economic Naturalist	60
Midterm	100
Final	150
Total	810

The grading scale is A: $\geq 92\%$, A-: 90-91%, B+: 88-89%, B: 82-87%, B-: 80-81%, C+: 78-79%, C: 72-77%, C-: 70-71%, D+: 68-69%, D: 62-67%, D-: 60-61%, F: $< 60\%$. Grades will not be adjusted from this scale for loss of scholarship, loss of ability to graduate, loss of athletic eligibility, parent/pet/partner freak out, or loss of self-esteem, so please don't ask.

There is no extra credit. Spend the time you would have spent on extra credit learning the material in the first place.

Grades of "Incomplete": In accordance with the MSU undergraduate catalog, it is class policy not to give incomplete grades except for extreme personal hardship or unusual academic situations that are verifiable or certified through the Office of Student Success.

Academic Integrity: Please read and comply with the student conduct expectations contained in the *Student Responsibilities* section of MSU's "Conduct Guidelines and Grievance Procedures for Students," available online at http://www.montana.edu/policy/student_conduct/#studentrespon. For this class, the homework assignments may be done in collaboration with other students, but simply copying another student's answers is a violation of academic integrity. Your answers to exams, quizzes, and discussion questions should be your own work. Violations of academic integrity diminish the value of a degree earned at MSU and cheating will result in failure on the assignment and/or the course and all other disciplinary sanctions possible.

Use of AI: In this course, you may utilize AI language models like ChatGPT as a resource to support your writing assignments. While the AI language models can help refine your writing, it is important to remember that it is an AI system and not a substitute for your critical thinking and creativity. If you choose to use this tool, apply it as a supplement to your writing process and do not rely solely on its suggestions. Ultimately, you are responsible for the content and quality of your work. Therefore, you should critically evaluate ChatGPT outputs for accuracy, potential bias, and relevancy. It is essential to ensure that your writing remains original and properly attributed, including citing outputs or text generated by ChatGPT. Please see the [How to cite ChatGPT](#) in APA Style resource.

Health-Related Absences: Please evaluate your own health status regularly and refrain from attending class and other on-campus events if you are ill. MSU students who miss class due to illness will be given opportunities to access course materials online. You are encouraged to seek appropriate medical attention for treatment of illness. In the event of contagious illness, please do not come to class or to campus to turn in work. Instead notify me by email about your absence as soon as practical, so that accommodation can be made. Please note that documentation (a doctor's note) for medical excuses is not required.

Diversity Statement: It is my intent that students from all diverse backgrounds and perspectives be well-served by this course, that students' learning needs be addressed both in and out of class, and that the diversity that students bring to this class be viewed as a resource, strength and benefit. It is my intent to present materials and activities that are respectful of diversity: gender identity, sexual orientation, disability, age, socioeconomic status, ethnicity, race, religion, culture, perspective, and other background characteristics. Your suggestions about how to improve the value of diversity in this course are encouraged and appreciated. Please let me know ways to improve the effectiveness of the course for you personally or for other students or student groups. In addition, in scheduling exams, I have attempted to avoid conflicts with major religious holidays. If, however, I have inadvertently scheduled an exam or major deadline that creates a conflict with your religious observances, please let me know as soon as possible so that we can make other arrangements.

Inclusivity Statement: I support an inclusive learning environment where diversity and individual differences are understood, respected, appreciated, and recognized as a source of strength. We expect that students, faculty, administrators, and staff at MSU will respect differences and demonstrate diligence in understanding how other peoples' perspectives, behaviors, and worldviews may be different from their own.

Disability Statement: If you are a student with a disability and wish to use your approved accommodations for this course, please contact me during my office hours to discuss. Please have your Accommodation Notification or Blue Card available for verification of accommodations. Accommodations are approved through the Office of Disability Services located in SUB 174. [Please see Disability Services for more information by clicking here.](#)
